

ROHIT RAMESH ZORE

Cybersecurity Analyst | Vulnerability Assessment | Network Security | Security Operations

+91 8879466037 | rzore430@gmail.com | Mumbai, Maharashtra 400030 | linkedin.com/in/rzore430 | github.com/zore1803

CAREER OBJECTIVE

Aspiring Cybersecurity Analyst seeking an entry-level role in SOC operations, vulnerability assessment, or security analysis where I can apply hands-on training in network security, threat analysis, and security operations to protect organizational assets and contribute to a strong security posture.

PROFESSIONAL SUMMARY

Cybersecurity fresher ranked top 5% globally on TryHackMe out of 3M+ users, with 77+ hours of structured security training across 2 organizations. Completed a 4-month cybersecurity internship at Elevate Labs (Jan–Apr 2026), delivering vulnerability assessments, security tool development, and structured risk reports. Currently pursuing instructor-led CompTIA Security+ and PenTest+ training at AIPLTech Pvt Ltd. Developed 2 security-integrated applications — LOQIT and E-Guruji — implementing OAuth 2.0, JWT authentication, RBAC, and OWASP Top 10 controls. Proficient in Wireshark, Python security scripting, firewall analysis, CIA Triad, threat intelligence, and risk management frameworks.

SKILLS

Security Assessment: Vulnerability Scanning, Security Reporting, Python Security Scripting, Keylogger Development

Network Security: Wireshark, TCP/IP Analysis, Firewall Configuration, Network Traffic Analysis, Active Directory Basics

Threat & Risk Management: CIA Triad, Threat Analysis, Malware Analysis, Social Engineering Awareness, Risk Assessment, OWASP Top 10

Authentication & Access: OAuth 2.0, JWT, Role-Based Access Control (RBAC), Secure Session Management, Password Policy Analysis

Operating Systems: Linux (Ubuntu), Windows Security, Kali Linux (Learning)

Security Tools: Wireshark, Git, GitHub

Programming: Python (Scripting & Automation), JavaScript, Java (Basics), HTML, MySQL

CERTIFICATIONS

- Jr. Penetration Tester – TryHackMe
- CompTIA Pentest+ Learning Path – TryHackMe (32+ hours)
- AI Agent Architect – IBM
- Generative AI – GDSC
- ADCAG – Shree Institute

EXPERIENCE

Cybersecurity Trainee | AIPLTech Pvt Ltd, Kharghar

May 2026 – Present

- Enrolled in structured instructor-led CompTIA Security+ and PenTest+ program to build industry-standard skills in security operations, covering 10+ modules including threat landscape, malware analysis, and risk management.
- Studied the complete cybersecurity threat landscape — CIA Triad, threat actors, attack surfaces, and security controls — enabling identification of real-world attack vectors in lab environments.
- Analyzed malicious code categories (ransomware, Trojans, worms, keyloggers) to understand infection vectors, propagation methods, and mitigation strategies for each threat type.
- Trained on social engineering attack methods including phishing, vishing, and password attacks; learned detection indicators and organizational defense strategies.
- Applying risk identification and risk management frameworks to assess security posture and prioritize controls in alignment with CompTIA Security+ SY0-701 exam objectives.

Cybersecurity Intern | Elevate Labs

Jan 2026 – Apr 2026

- Tasked with internal security testing: conducted vulnerability assessments on systems and network configurations, identifying 5+ misconfiguration categories including weak credentials, open ports, and improper access controls.
- Developed a functional Python-based keylogger and vulnerability scanner from scratch for authorized security testing, demonstrating applied scripting and tool-building capabilities under senior mentor supervision.
- Analyzed live network traffic using Wireshark across multiple sessions, successfully detecting anomalous packet patterns and flagging potential indicators of compromise (IOCs) for review.
- Reviewed firewall rules and access control configurations across test environments, documenting gaps and recommending hardening measures to reduce the organization's attack surface.
- Produced structured security reports for each assessment with risk severity ratings (High/Medium/Low) and prioritized remediation steps, developing documentation skills critical for SOC and analyst roles.

PROJECTS

Security Developer – LOQIT | Anti-Theft Hardware Security Platform

Oct 2025 – Present

- Designed OAuth 2.0 and JWT-based authentication architecture securing device-level access for 3 distinct user roles, preventing session hijacking and unauthorized privilege escalation.
- Built a BLE hardware-identity binding system establishing a cryptographic trust chain between physical devices and user accounts, directly mitigating device spoofing and cloning attacks.
- Implemented RBAC for a Law Enforcement Command Center ensuring strict data access control by role and department, reducing unauthorized data exposure risk.
- Applied encrypted API communication and input validation across all endpoints to protect data in transit and prevent injection-based attacks.

Security-Focused Developer – E-Guruji | Web Application

Sep 2024 – Oct 2024

- Implemented JWT authentication with secure session management and RBAC for 3 user roles (user, priest, admin), ensuring zero cross-role unauthorized access.
- Applied OWASP Top 10 secure coding practices — input validation, parameterized queries, and proper error handling — to mitigate SQL injection and broken access control vulnerabilities.
- Integrated Razorpay payment gateway with server-side transaction validation, ensuring payment integrity and preventing manipulation or replay attacks.

EDUCATION

B.E. – Artificial Intelligence & Data Science | Vasantdada Patil College of Engineering, Mumbai 2023 – 2027 (Expected)

CGPA: 7.27 / 10.0 | Relevant Coursework: Networking, Operating Systems, Data Structures, Python Programming, Cryptography Fundamentals

HSC – Science (PCM) | D.G. Ruparel College, Mumbai

2021 – 2023

Percentage: 53.5%

ACHIEVEMENTS & ACTIVITIES

- Ranked Top 5% globally on TryHackMe out of 3M+ users across 100+ penetration testing and cybersecurity challenge rooms.
- Treasurer – Computer Society of India (CSI), College Chapter — managed budget and coordinated technical events.
- College-level Volleyball Player – University Sports Team.
- Languages: English (Fluent), Marathi (Native), Hindi (Fluent).
